

## QINGDAO TONGJIA TEXTILE MACHINERY CO., LTD

Drawing Frame Machine  
Model: FA306A

### Main Feature:

- 1) This modern and latest technology drawing frame machine in spinning industry .
- 2) This commercial type machine is used to improve the uniformity, arrangement, parallel and straighten the hooked of fibres in the sliver by drawing, mixing/blending, doubling and Auto leveling.
- 3) Adjustable draft ratios for coiler, front draft, back draft and creel.
- 4) Digital drawing adjustment technology for changing draft ratio.
- 5) Automatic filter cleaning and auto doffing system.

### Technical Specification:

Model	FA306A
Condition	Brand new and latest version
Control system	PLC control, automatic system
Display type	Digital LCD display
Display size	7 inches
Delivery speed	200-800 m/min
Delivery head	2
Doubling	8
Drafting system	3 over 3 roller drafting system with pressure bar and guiding top-roller.
Total draft	4-14 times
Can size	400x1100mm or 500X1100mm
Power supply	380-440V, 50Hz, 3 phase
Energy consumption	6.8Kw
Weight	1800kgs
Maximum height	13.5 feet
Dimension	2060x800x1700mm
