

## QINGDAO TONGJIA TEXTILE MACHINERY CO., LTD

Weight Separator Machine  
Model: FA125

### Feature:

- 1) This commercial type machine is used for excluding most of trash and abnormal matter in fiber tuft (Fiber length: 22-76mm).
- 2) Brand new and latest version
- 3) FA125 weight separator is used to remove heavier trashes and foreign matters in fiber tufts through centrifugal forces under the function of air currents. When iron matters pass through the bridge magnet. These matters are sucked and removed (with the function of semicircle grid bar, trashes are separated from fiber tufts ). Then fibers are conveyed to the next process through suction pipes.
- 4) The trashes in fibers will be removed through centrifugal forces without damage to fibers when they pass through the semicircle grid bar channel.

### Technical Specification:

Condition	Brand new
Control System	Automatic control
Choose fibers below	76m
Working width	500 mm
Power supply of transport fan	380V,50Hz, 3Phs,
Energy Consumption of Transport fan	3 KW/5.5 KW
Weight	300KGS
Maximum height	13.5 feet
Dimension	1846mmX850mmX1642mm
